

Fujinon EG-530WR, Gastroscopio

Descripción

**FUJINON
EG-530WR
Gastroscopio**

The EG-530WR offers a wide field of view of 140° and a reliable CCD chip to provide exceptional visualisation of the examined area. Additionally, a working channel of 2.8 mm facilitates a broad range of procedures such as biopsies and treatments.

Specifications

Optical System

- Viewing direction: Forwards
- Observation range: 4 to 100 mm
- Angle of view: 140°

Insertion tube

- Distal end \varnothing : 9.4 mm
- Insertion tube \varnothing : 9.3 mm

Bending capacity

- Bending capacity up/down: 210°/90°
- Bending capacity left/right: 100°/100°

Operation channel \varnothing : 2.8 mm

Length

- Working length: 1,100 mm
- Total length: 1,400 mm

Size of image: 130%
