

ELECTROPHORESIS AUTOMATED SYSTEM

# miniLITE

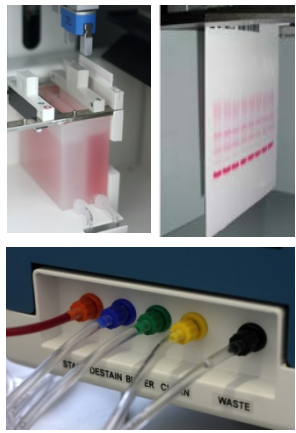

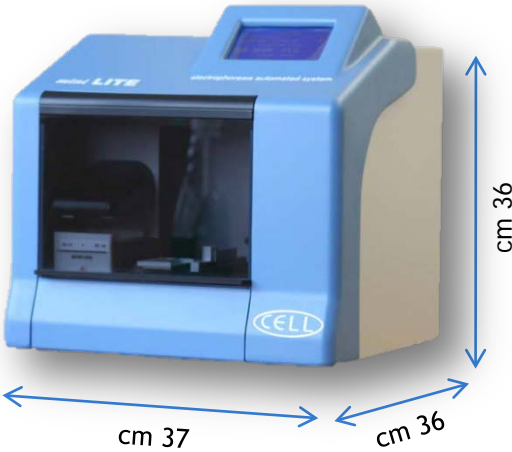

**The smaller size for automation in clinical electrophoresis**

# ELECTROPHORESIS AUTOMATED SYSTEM

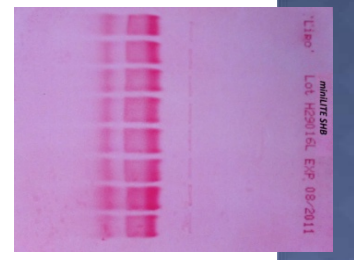

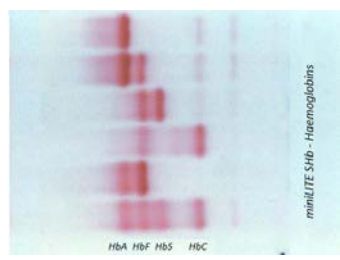

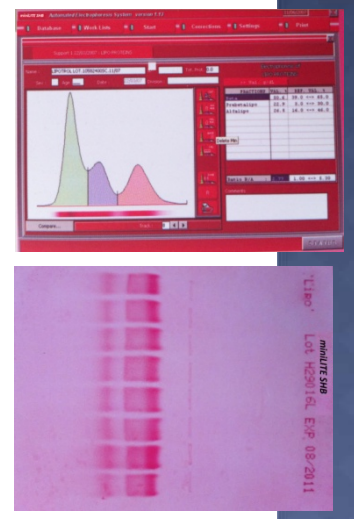

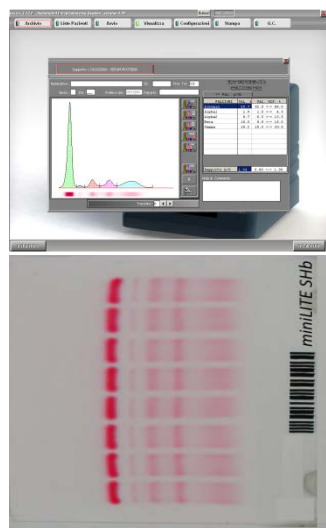

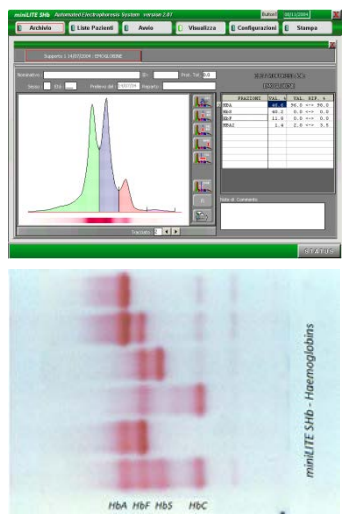

small in dimension – great in automation and reliability

Fully automated - from reagents management to automated fast scanning – suitable for 4/8 samples

Versatile – allows to perform the most spread techniques: Serum Proteins, Haemoglobins, Lipoproteins

Complete – software provides archive species management (veterinary) and statistic programs

CELL – Cellulose Acetate supports balanced Kits and applicative support
