

The Aquarius LT is a practical system where cost-efficiency and ease-of-use are essential. As the most comprehensive Urodynamics software suite UDS120™ and i-LIST™ offer a world class experience including:

- **USER-FRIENDLY:** Intuitive touch-screen central hub, voice guidance and customised remote-control means technology that enhances simplicity.
- **STREAMLINED:** Intelligently manages appointments, previous visits, patient information and test data providing security and efficiency.
- **DYNAMIC:** Our highly customisable user interface and reporting tools (i-LIST™) allow you to run your practise your way.

The Anatomy of Excellence

- **Central Hub:** Unparalleled ease-of-use by enabling device management
- **Urocap (fifth generation):** For perfect integration with the Aquarius system platform
- **Pump Module:** Silencing technology, range of flow rates and multiple calibration line storage
- **Uni-Spine:** Offers peerless versatility through an artfully engineered library of precision components.
- **Roam DX:** Delivers high fidelity performance
- **Bubble Detection and Infusion Measurement:** Heighten precision and procedural efficiency
- **Uroflow stand:** Upgrades in size, quality and usability over any predecessors
- **UPX Wireless Puller:** Boasts industry footprint and wireless battery operation
