

2016 COMMERCIAL PRODUCT REFERENCE GUIDE

LSPRO™ COMMERCIAL LAMP SERIES

The stylized products in our new LSPro™ Commercial line were engineered to take commercial LED to the next level by exceeding standard commercial criteria. Take a look and you'll see products with high CRI, increased lumen output, and Energy Star ratings. These products adhere to our highest design and testing requirements and are poised to become the new standard that designers and commercial consumers will demand.

CRI: ≥ 90

GLIMPSE™ LED DOWNLIGHTS

Designed to convert most 4", 5" or 6" recessed cans to a high performance LED luminaire almost as simply as installing a new bulb. Lighting Science's integration of leading edge optical, thermal and driver design excellence are on display with Glimpse™ – a luminaire of which there truly is no equal. Using just a fraction of the material of other LED downlight modules, Glimpse is light in material, but never light on performance. LED down lighting has never been so easy.

6" GLIMPSE™ INDIRECT 65WE *
2700K, 3000K, 4000K

4" GLIMPSE™ 50WE *
2700K, 3000K, 4000K

6" GLIMPSE™ 75WE *
2700K, 3000K, 4000K

THE MARQUEE SERIES™ FILAMENT LED

Inspired by the past, but designed for the future. Lighting Science's Marquee™ filament LED series recreates the nostalgic look of an incandescent lamp- sleek, simple and room-enhancing, yet lasting up to 7x longer than a traditional incandescent. These lamps are the perfect choice to give you the look and feel you have grown to love in soft, inviting, decorative indoor lighting.

THE HEALTH SERIES BIOLOGICAL LED LIGHTING

Boost your energy or wind down to a good, healthy night's sleep all through the science and technology of light. Designed in collaboration with NASA to help Astronauts sleep better and be more alert while stationed at the International Space Station, the Health Series™ of LEDs utilize specific light wavelengths to optimize your daytime performance and enhance your body's natural melatonin production to encourage sleep. We put the power in your hands.

THE VIVIDGRO SERIES™

Take your growing to the next level with our VividGro Series. These revolutionary products were created by the same Lighting Science engineers who helped both astronauts aboard the International Space Station and field station scientists in Antarctica to cultivate their own food. Our LED grow lighting solutions are excellent for a variety of agricultural and horticultural lighting applications, including commercial grow facilities, homeowner/hobbyists, greenhouses, and growth chambers.
