En **LOMISA** nos centramos en los proyectos con la finalidad de mejorar la eficiencia operativa de un centro de salud. Hacemos frente, junto a nuestros clientes, al reto de modernizar sus instalaciones y servicios, proporcionando tecnologías vanguardistas, procedimientos probados y protocolos clínicos actualizados.

Nuestra visión a largo plazo siempre mejora la calidad de vida de los pacientes, que deberían beneficiarse del uso de las instalaciones y servicios. Mediante una estrecha colaboración con los profesionales y gestores del sector sanitario, proporcionamos planes, proyectos ejecutables y soluciones materiales para alcanzar los objetivos de sus instituciones públicas o privadas.

Al trabajar a nivel de gobiernos o administraciones centrales, también consideramos la oportunidad de reforzar el funcionamiento de la atención primaria para facilitar o ampliar el acceso de la población a los estándares apropiados de cuidado preventivo, diagnóstico y crítico. Nuestra estrategia para lograr esos objetivos es la potenciación de los actores claves, para que hagan lo correcto.

Nuestro equipo incluye a gestores e ingenieros con una gran experiencia en el sector hospitalario, ampliamente cualificados en el uso de la tecnología médica y la gestión de los servicios clínicos, que reciben el apoyo de una extensa red internacional de asesores clínicos de primer nivel para cubrir cualquier especialidad, desde los servicios clínicos centrales del hospital a las terapias modernas y complejas.

En **LOMISA** proporcionamos una amplia gama de servicios (instalación, ajuste, puesta en marcha, formación técnica y al usuario, mantenimiento preventivo y correctivo durante el periodo de garantía o el ciclo de vida útil) al presupuestar todas nuestras soluciones de equipamiento, como parte de nuestro fuerte compromiso con el cliente.

Otros equipamientos que suministramos:

- Anatomía patológica
- Esterilización y desinfección
- Rehabilitación
- Imagenología
- Laboratorio
- Medicina deportiva
- Oncología
- Quirófanos
- Refrigeración

NON-WOVEN FABRIC STERILE OPHTHALMIC SURGERY DRAPES

Hole 6x9 cm with incision film. Single bag to receive fluids and adaptable bar.

• 23634 OPHTHALMIC SURGERY DRAPE 80x100 cm - sterile - box of 40

Hole 10x10 cm with incision film. Double bag to receive fluids with adaptable bar

• 23635 OPHTHALMIC SURGERY DRAPE 160x160 cm - sterile - box of 15

Hole Ø11 cm with incision film. Double bag 35x73 cm to receive fluids with adaptable bar and adaptable bar for nasal septum. Wrapped in crepe paper.

• 23636 OPHTHALMIC SURGERY DRAPE 160x260 cm - sterile - box of 10

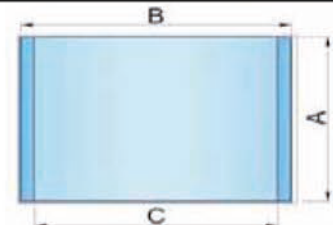

SURGERY COTTON DRAPES

- 26495 DRAPE 90x150 cm
 - 26496 DRAPE 150x150 cm
 - 26497 DRAPE 250x150 cm
- Made in 100% high quality cotton, green colour.
Made in Europe.

INCISION FILM - STERILE

Its purpose is to define the anatomic part of the patient where the surgery will be done. It is applied at the point where the wound is, to protect it from possible contamination. Incision film made of adhesive polyurethane.

POLYESTER OR MICROFIBRE SURGERY DRAPES

100% TEXTURIZED POLYESTER DRAPES

Studied for replacing the classic cotton drape in operating rooms.

Advantages:

- it does not have particles release of dust or cotton fibers that could cause infections during surgery
- various usability on the field:
 - as a sheet under the patient
 - as a towel
 - to tamponage, considering its high absorbency
 - as a pre or post surgery cover, thanks to the capability of keeping a good body temperature

Polyester texturized fabric

- 41000 POLYESTER DRAPE 90x150 cm - light blue
- 41001 POLYESTER DRAPE 150x150 cm - light blue
- 41002 POLYESTER DRAPE 250x150 cm - light blue

MICROFIBRE DRAPES

(99% polyester + 1% carbon fibre)

The microfibre line is conceived for operating room.

The characteristics and abilities are various:

- the fabric does not absorb liquids, maintaining the operating field dry;
- the fabric does not have particles release of dust or fibre that could cause infections on the patient.

GIMA fabric is composed of polyester and carbon fibres. The addition of carbon fibres serves as protection from potential electric discharges.

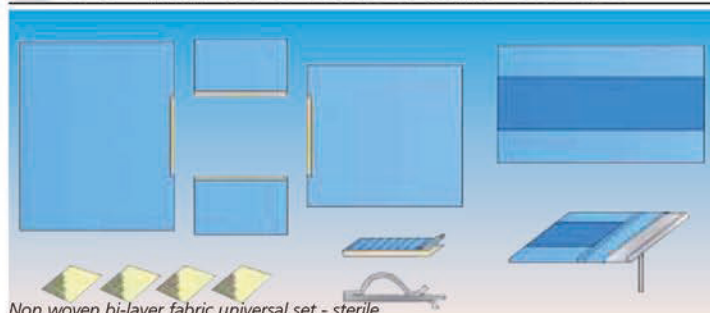

- 41009 MICROFIBRE DRAPE 90x150 cm - green
- 41010 MICROFIBRE DRAPE 150x150 cm - green
- 41011 MICROFIBRE DRAPE 250x150 cm - green

Sizes of drapes may vary ±5% due to fabric processing during production phase

Microfibre fabric

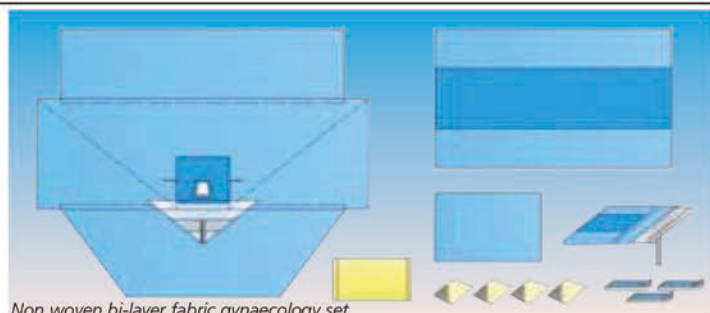

STERILE SURGERY SETS

Non woven bi-layer fabric universal set - sterile

- **23640 UNIVERSAL SET - sterile - box of 10**
- 1 table cover 150x200 cm with central absorbent band
- 1 Mayo stand cover 80x145 cm
- 1 standard surgical drape, 150x240 cm with adhesive tape
- 1 standard surgical drape, 180x200 cm with adhesive tape
- 2 standard surgical drapes, 75x90 cm with adhesive tape
- 4 towels 35x40 cm
- 1 adhesive strip 10x50 cm
- 1 tube holder 2.5x20 cm

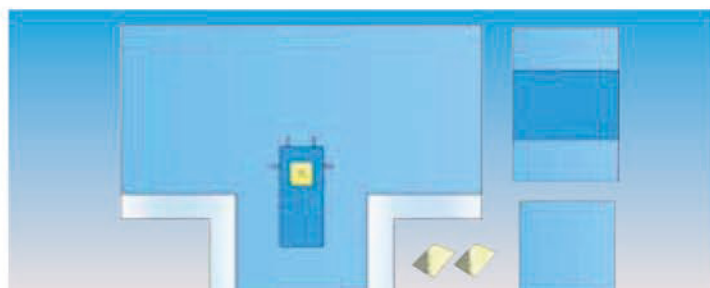

Non woven bi-layer fabric gynaecology set

- **23641 GYNAECOLOGY SET - sterile - box of 8**
- 1 table cover 150x200 cm with central absorbent band
- 1 Mayo stand cover 80x145 cm
- 1 gynaecology drape for lithotomy position 290x240 cm with adhesive hole, built-in
- 1 pair of leggings, bag for liquid collection with filter and drain valve
- 1 drape 75x90 cm
- 1 incision film 35x50 cm
- 3 adhesive strips 10x50 cm
- 4 towels 35x40 cm

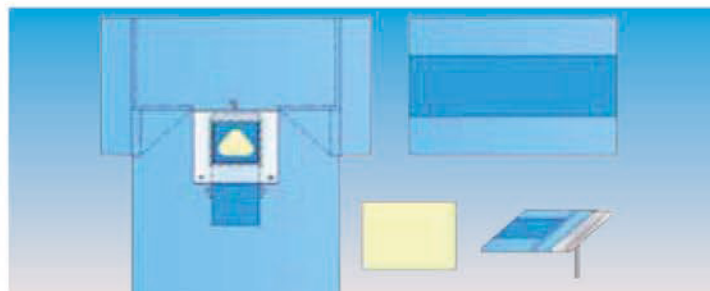

Non woven bi-layer fabric orthopaedy set for knee arthroscopy - sterile

- **23642 SET FOR KNEE ARTHROSCOPY - sterile - box of 8**
- 1 table cover 150x200 cm with absorbent central band
- 1 Mayo stand cover 80x145 cm
- 1 standard surgical drape, 150x180 cm
- 1 orthopaedy drape for arthroscopy at knee 230x320 cm with elastic hole and bag for liquid collection
- 1 stockinette 22x75 cm
- 3 adhesive strips 10x50 cm
- 4 towels 35x40 cm

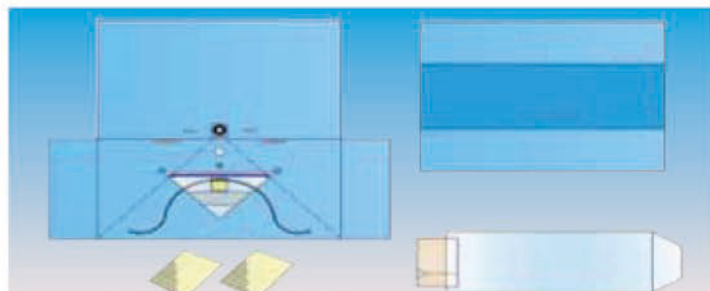

Non woven SMS fabric orthopaedy set for hand surgery - sterile

- **23643 SET FOR HAND SURGERY - sterile - box of 8**
- 1 table cover 150x200 cm with central absorbent band
- 1 standard surgical drape, 100x100 cm
- 2 towels 35x40 cm
- 1 T-shape drape for hand surgery 370x190x290 cm with elastic hole 5 cm and cable fixing Velcro strips

Non woven SMS fabric obstetrics set for caesarean section - sterile

- **23644 SET FOR CAESAREAN SECTION - sterile - box of 8**
- 1 table cover 150x200 cm with central absorbent band
- 1 Mayo stand cover 80x145 cm
- 1 drape for caesarean section 260x200x310 cm with incision film and bag for liquid collection
- 1 drape "baby blanket" 75x90 cm

Non woven SMS fabric urology set for TUR - sterile

- **23645 UROLOGY SET FOR TUR - sterile - box of 8**
- 1 table cover 150x200 cm with central absorbent band
- 1 urology drape for TUR, 200x280x220 cm with perineal and subpubic holes,
- 1 bag for liquid collection with filter, adhesive tape and straps
- 1 camera drape 13x250 cm
- 2 towels 35x40 cm

Made of non-woven bi-layer fabric. Polypropylene band

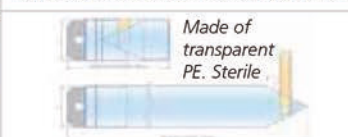

- **23650 Table cover 150x200 cm - sterile - box of 20**

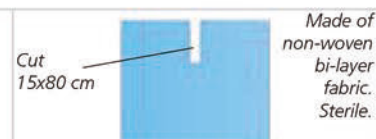

- **23651 Mayo stand cover 80x145 cm - sterile - box of 40**

- **23654 Adhesive pocket for tools 35x42 cm - box of 100**

- **23655 Camera drape 13x250 cm - box of 100**

Made of non-woven bi-layer fabric. Sterile.

- **23652 Drape, 200x240 cm with adhesive U shape cut - box of 15**

Made of transparent PE. Sterile.

- **23656 Bag to cover instruments 75x90 cm - box of 100**

Made of non-woven bi-layer fabric. Sterile.

- **23653 Pair of leggings 75x130 cm for urology/gynaec. - box of 20**

Sterile

- **23657 Adhesive strip 10x50 cm - box of 200**

TUNGSTEN CARBIDE INSTRUMENTS - GOLD LINE

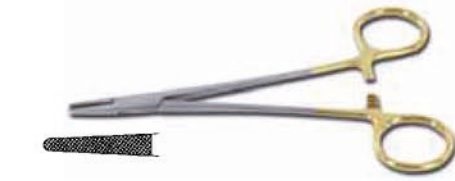

GOLD LINE - TUNGSTEN CARBIDE INSTRUMENTS

A top quality theatre use Tungsten Carbide Instruments made in stainless steel AISI 410 (AISI 420 for scissors) with very hard tips made in Germany to help surgeons perform precision surgeries with best results. Highly reliable for hardness and corrosion resistance.

• 26985 GENERAL SURGERY PACK - sterile
 Ready to use pack including all necessity for a general surgery procedure.
 Peel open PE + tyvek envelope.
 Sterile EO.

KIT CONTENT	
1 table cover 150x200 cm	4 hand towel
2 surgical gown XL	1 bowl 90 ml
2 adhesive drapes 75x90 cm	1 kidney dish
1 foot drape (ADH side) 150x175 cm	10 scalpel n°15
1 head drape (ADH side) 150x240 cm	5 gauze swabs 10x20 cm
2 syringes 10 ml	4 gauze balls 30 mm
2 needles 21Gx1.5"	2 foam stick 15 cm
1 scalpel n°11	1 basic tray

SUTURES - FINE WOUND CLOSURE MATERIAL

CLINISILK STERILE BLACK BRAIDED SILK SUTURE B.P.

Non-absorbable sutures made from pure natural silk, braided to form a multifilament thread, double treated with a silicone coating to prevent capillarity and to enhance ease of passage through tissue. Silk sutures are considered to have the best handling and tying characteristics. Suture length: 45 cm. Application: soft tissue approximation and ligation.

CLINILON STERILE BLUE MONOFILAMENT NYLON SUTURE B.P.

Non-absorbable synthetic monofilament suture made from Polyamide 6.6. No tissue reaction, excellent tensile strength, easy handling and secure knotting. Suture length: 45 cm. Nylon is a highly favoured material for skin closure. Application: skin closure, general soft tissue approximation and ligation.

GIMA code		CLINISILK AND CLINILON SUTURES - pack of 12 pcs.					
Silk	Nylon	Gauge	Metric	Needle	Needle shape	Type of needle	Suture length

CLINITRO SUTURES: BLUE POLYVINYLIDENE FLUORIDE MONOFILAMENT NON ABSORBABLE PVDF SUTURE

It is indicated in procedures where non-absorbable monofilament sutures are required, especially skin and fascia closure. CliniTro is used in place of nylon for skin closure. The material is much softer and more pliable.

Tensile strength is higher than nylon and knot holding is far superior.

Our SG (Super Glide) are all premium reverse cutting needles. Specifically suggested for dermatology and plastic surgery are our equivalents to Ethicon's Multipass needles.

code		CLINITRO SUTURES - pack of 12 pcs.

CLINISORB STERILE VIOLET BRAIDED PGA SYNTHETIC ABSORBABLE SUTURE

CliniSorb is a synthetic absorbable braided suture made from a polymer of Glycolic acid. This material is inert, non collagenous, non-antigenic, non-pyrogenic and has a high tensile strength and predictable absorption rate, allowing wound support for approx. 21 days, complete absorption in 56-70 days. It is treated with a surface coating to ensure smooth tissue passage and enhance knot sliding. No risk of infection, inflammatory processes or exposure to protein digesting enzymes in the gastro intestinal tract. Suitable for both skin closure and where non-permanent wound support is indicated. Application: dental, general skin closure, gynaecology, plastic and general surgery, orthopedics and urology.

code		CLINISORB SUTURES - pack of 12 pcs. - synthetic

25902	4/0	1.5	19 mm	3/8	Reverse cutting	45 cm	

CLINIMONO Q SYNTHETIC MONOFILAMENT

Undyed monofilament rapid absorbable sutures composed of PGCL. Complete absorption in 90 days. Suitable for soft tissue approximation and ligation but not for cardiovascular or neurological procedures. This product is our equivalent to Ethicon's Monocryl. Also used for subcutaneous and subcuticular closure in general surgery as well as skin closure for out of town patients who cannot return to have suture removed.

code		CLINIMONO Q SUTURES - pack of 12 pcs.

Supplied with manual in GB, FR, IT, PT, ES, Arabic.

DISPOSABLE SKIN STAPLER DEVICE

• 25890 DISPOSABLE STERILE SKIN STAPLER

Simple and easy to operate. Staples are made of High Quality 317 L Stainless Steel for medical use, each device is provided of 35 staplers. High sewing up and stapling speed help shorten the time of sewing and avoid cross infection of contagious diseases. Reduced tissue reaction, thinner scar after operation and faster wound healing. Painless and convenient staples removal after the incision has healed up.

To be used for skin closure in operating room, labour and delivery, emergency department, outpatient surgery, clinics and physician's office.

SKIN STAPLE REMOVER

• 25892 DISPOSABLE REMOVER FORCEPS - box of 20 pcs.

Practical disposable forceps for removing regular and wider size staples. Sterile.

• 25895 SR-3 DISPOSABLE SKIN STAPLE REMOVER - box of 10 pcs.

3M original forceps for removing staples. Sterile. 26737

S/S STITCH/SUTURE REMOVERS:

• 26737 SPENCER SCISSORS - 13 cm

• 26722 MICHEL STITCH REMOVER FORCEPS - 13 cm

SKIN MARKER

• **33179 SKIN MARKER - dual tips gentian violet - box of 10**
Double tips skin marker with polypropylene cap and body. Polyester fiber tips. Ultra fine tip utility marker to write on adhesive labels and infusion bags.

Regular tip surgical skin marker for use on patient skin. Washable with water and soap. Size 138xØ 12.5 mm. Multilanguage box and manual: GB, FR, IT, DE, ES, PT, GR, PL, SE, RO, HU, Arab.

DERMATOGRAPH MARKERS

- 33175 DERMATOGRAPH MARKER - blue
- 33176 DERMATOGRAPH MARKER - white
- 33177 DERMATOGRAPH MARKER - red
- 33178 DERMATOGRAPH MARKER - mix*

*2 pencils each colour

Special dermatograph pencil to mark the skin for identification of areas to be treated. Made in cedar wood with

wax lead. Size 175xØ 7 mm. Suitable for general surgery, dermatology, orthopaedy, radiology, ... Pencils are sold non sharpened in box of 6 with 1 pencil sharpener included. Multilanguage box and manual: GB, FR, IT, DE, ES, PT, GR, PL, SE, RO, HU, Arab.

SKIN MARKER - STERILE

• **33181 CLINICON® - fine tip - sterile - box of 10**
The Clinicon® Surgical Skin Marker features a versatile tip for precise fine line marking preferred in plastic surgery or when held at an angle, broad line marking for applications in general, neuro and vascular surgery, as well as radiology and radiation therapy.

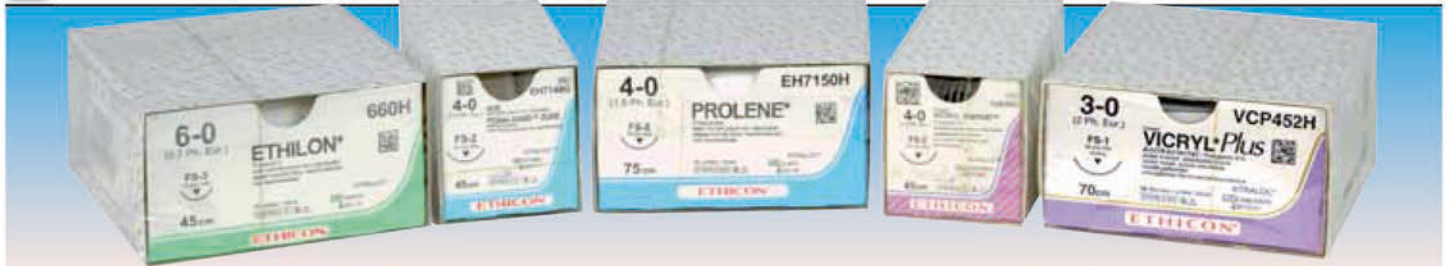

For heavier lines, hold the pen at an angle and use the shoulder of the tips (2 mm)

Hold the pen vertically while applying a fine line (0.2 mm)

The marker's high visibility Gentian violet ink is nontoxic, non tattooing and surgical prep-resistant. Markings can be removed from the skin with isopropyl (rubbing) alcohol. The package is easy to open, HIBC bar coded and includes a separate six inch, flexible ruler calibrated in both inches and centimeters. Sterile EO.

GIMA: DISPOSABLE S/S SCALPELS & STAINLESS OR CARBON STEEL BLADES

"GIMA" DISPOSABLE BLADES - sterile - dispenser box of 100
Surgical blades are available in high quality carbon steel and stainless steel with or without safety round tip. Manufactured in accordance with the requirements of British Standards BS 2982:1992, ISO 7740:1985, ISO 7153-1: 1991, EN 10088-3: 2005. Each blade is hallmarked and individually packed in aluminium foil. Carbon Steel blades are VPI paper protected. Blade size is clearly identified on the reverse side of the foil peel-pack and on product unit boxes.

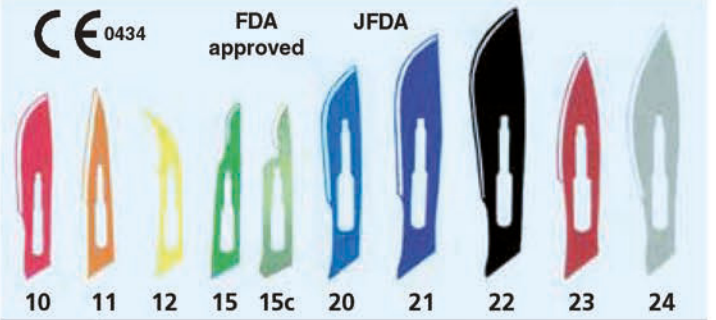

"GIMA" DISPOSABLE SCALPELS - sterile - box of 10
S/S blade fitted into an ABS plastic handle. Individually packed in sterilized envelope. Safety blade guard for premium model.

"GIMA" SAFETY PROTECTIVE SHIELD SCALPELS - sterile
Protective scalpels with a clear view shield that protects against injuries before use, between steps of procedure and after disposal. Latex and phthalates free.
Clear view protective shield: blade clearly visible
Single handed action, easy to use for both right and left hand users
Blade size colour coded button
Stainless steel blade
Stead fast disposable lock, audible, visual and tactile indication
Graduated handle (cm)

Complies with US OSHA standard 29 CFR 1910.1030 and European Directive 2010/32/EU

SINGLE-USE STERILE DERMAL CURETTES

Stainless steel sharp cutting edge for soft or weak tissue.
Size embossed on each curette for easy identification.

Sterile ready-to-use. Use once and discard eliminates need for re-sharpening and sterilization. Wide range of sizes.
Used in the following minor surgical skin procedures:
Curettage of a basal cell carcinoma, curettage of a verruca and curettage of any other benign neoplasms of the skin.
Clinical Areas: dermatology, surgical, podiatry, veterinary

Made in Japan

25997	Faeces container 60 ml	Polypropylene	box of 100

PLASTIC HOLLOWARE - AUTOCLAVABLE 135°C

All gallipots and kidney dishes are graduated

AUTOCLAVABLE AT 135°C

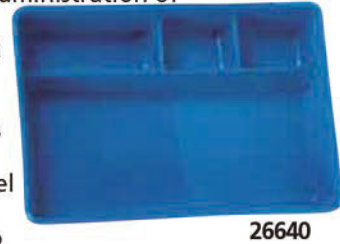

PLASTIC HOLLOWARE - autoclavable hundreds of times
For the protection and delivery of sterile instruments to operating rooms. For the administration of procedures, holding cleansing solutions and the administration of medicines and fluids.

4 good reasons to choose plastic line:

- 50% cheaper than stainless steel equivalent
- autoclavable at 135°C with no limits
- attractive modern design
- lighter than equivalent stainless steel

All products are manufactured from polypropylene material that is easy to clean, resistant to most healthcare chemicals.

- 26630 GALLIPOT/LOTION BOWL 60x40 mm - graduated 50 ml

HYPODERMIC SYRINGES IN 3 PARTS WITH AND WITHOUT NEEDLE

High-quality range of medical devices ensuring an optimal safety. The range of Hypodermic syringe INJ/LIGHT have been manufactured in compliance with the most important international standards in conformity with European Directive 93/42/EEC and with UNI EN ISO 9001/2000 - UNI EN ISO 13485/2004.

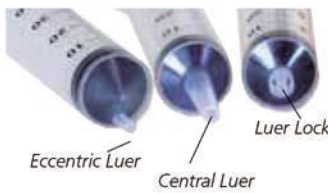

The INJ/LIGHT line is completely non-toxic and non-pyrogenic, made of transparent polypropylene with graduated black colour scale and individually packed in blister pack. Box in GB, FR, IT, ES, DE, PT, GR, RO, RU, YU, SA.

Needle in AISI 304 stainless steel triple bevelling

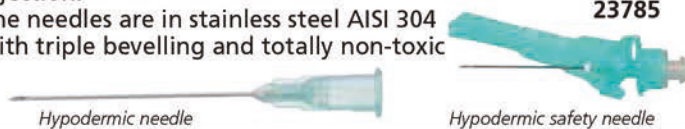

HYPODERMIC NEEDLES AND SCALP-VEIN SETS - STERILE

A line of hypodermic needles and scalp vein sets ensuring minimal trauma during penetration thanks to the triple bevelling. Each element of the needle is treated for painless injection.

The needles are in stainless steel AISI 304 with triple bevelling and totally non-toxic

MARGHERITA FINGERGUARD FOR HYPODERMIC NEEDLES

Internationally patented

23798

NO MORE ACCIDENTAL SYRINGE INJURIES

- 23798 MARGHERITA FINGERGUARD

Margherita is a Class I Medical Device that allows the operator to recap and remove the syringe needle in complete safety, eliminating the risk of accidental needle sticks to both healthcare workers and those responsible for the disposal of sharps.

Sterilizable: autoclavable (121°C for 15 min. or 135°C for 5 min.)

Ecological: promotes waste sorting as it enables just the needle to be disposed of in the sharps bin. Raw materials are biocompatible.

Safe: complete protection against accidental syringe needle sticks.

Economical: last 4 years, reducing costs by at least 50,000 € per year for a small hospital and over 200,000 € per year for a medium/large hospital.

THE PROBLEM: there are 960,000 accidental syringe stick injuries every year in Europe. The total cost estimate resulting from syringe needle stick injuries exceeds 1 billion Euros

LEGISLATION: European Directive 2010/32/EU requires Member States to adopt more effective provisions to protect workers from accidental needle stick injuries from syringes.

THE SOLUTION: margherita allows total safety to operator and to healthcare workers responsible for the disposal of sharps.

(two hands) (one hand)

GIMA SECURITY SYSTEM TO FUSE NEEDLES UP TO Ø 1.6 mm

- 25820 SECURITY SYSTEM - needle destroyer

To avoid accidents from used injection needles, GIMA has developed and patented Security System.

This Needle Destroyer generates a temperature of 1,000°C, hot enough to destroy stainless steel and all known bacteria/viruses. It fuses in 1-2 seconds needles up to a diameter of 1.2 mm and with some more seconds needles up to 1.6 mm

Safe for nurses, doctors, cleaning staff and patients.

Most of accidents by punctures with needles take place in the following circumstances that are avoided using the Needle Destroyer: placing the needle in its protective sheath, discarding a needle from a used syringe, carrying hospital residues. Destroyed needle material is sterilized and stored in a drawer at the bottom of the unit.

Long life and easy maintenance

It is sturdy, over 4 kg weight, and manufactured in best quality material. Only necessary maintenance is to change fusing spare parts every 4,000 needles.

minimum order: 2 pcs.

JETPULL 2 WITH GRADUAL ADJUSTMENT

Easy to use, allows single-hand operation.

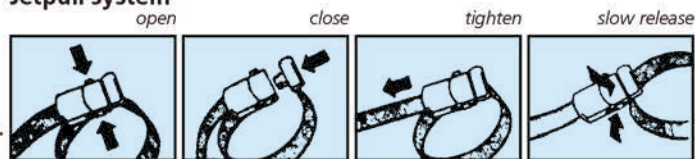

The patented 2 button system allows an easy opening of the fastening with 2 choices: smooth or fast, even when under tension.

Fastening device is made using recycled plastics (PVC free).

Ribbon is in special material to avoid any skin bruises. Blood proof.

Washable at 60/90° C and autoclavable. Made in Germany.

Jetpull system
